DH Drones Risk Assessment – Privacy Policy

Last updated: 19/11/2026

1. Who we are

DH Drones Risk Assessment is provided by DHdrones. You can contact us at info@dhdrones.co.uk

2. Summary

We do not collect, receive, store or have access to any of your information. The information you enter into the app stays on your own devices and in your own private iCloud account. There are no accounts, no advertising, no analytics and no tracking.

3. Information you enter in the app

The app lets you record information such as:

- Operation details (job reference, pilot name, site address or location, date, aircraft name and class, operating category and purpose)
- Conditions and site arrangements (weather, wind, visibility, take-off and landing area, airspace checks, people and access controls, emergency landing areas)
- Hazards, control measures, risk scores, mitigations and reassessments
- Confirmation of insurance for commercial operations
- Your GO or NO-GO decision, comments and pilot declaration
- Site photographs that you choose to attach
- Your signature, drawn on the screen

You choose what to enter. This information is used only to run the app, to show your risk scores and to create the reports and exports that you request.

4. Photographs

If you attach a photograph, the app uses Apple’s photo picker, which gives the app access only to the photos you select. The app stores a compressed copy of each selected photograph inside the assessment. It does not read the rest of your photo library.

5. Face ID and passcode

The app can optionally be locked using Face ID or your device passcode. This uses the standard authentication provided by your device. The app only receives a yes or no result from your device. It never receives, stores or has access to your face data, fingerprint or passcode. The lock applies only to the device on which you switch it on.

6. Where your information is stored

Your saved assessments are stored on your device. If you are signed in to iCloud, the app also syncs them between your devices using Apple's CloudKit service, in your own **private** iCloud database. Only you, signed in with your Apple ID, can access that data. We cannot see it, and it is not sent to us or to any third party by the app. Assessments you are still working on (drafts) are kept only on the device you are using until you save them. Apple's handling of iCloud data is described in Apple's own privacy policy.

7. Backups, reports and exports

The app can create backup files and PDF reports. These files contain the information you have entered, which can include names, locations, site photographs and your signature. They are created on your device, and you decide where they are saved or sent, for example to Files, iCloud Drive, AirDrop, email or another app. Once you share a file, it is subject to the privacy practices of the place you send it to. Please keep your backup files and reports secure.

8. What we do not do

- We do not collect personal data.
- We do not use advertising, analytics, crash-reporting or tracking tools.
- We do not sell or share your information.
- We do not use third-party services that receive your data.

9. Keeping and deleting your information

Your information stays in the app until you delete it. Deleting a saved assessment in the app removes it from your devices that sync through iCloud. Deleting the app removes the local copy from that device. To remove the synced copy from iCloud, go to **Settings → your name → iCloud → Manage Account Storage**, choose the app and delete its data. Backup files and reports you have saved elsewhere are not removed automatically; delete them yourself where you saved them.

10. Children

The app is not directed at children, and we do not knowingly collect information from anyone.

11. Your rights

Because we do not hold or receive your information, we have no personal data about you to access, correct or delete. You can view, change and delete everything you have entered directly in the app. If you have any questions about your rights under data protection law, please contact us at the address above.

12. Changes to this policy

If we change how the app handles information, we will update this policy and the date at the top. Please check it from time to time.
